fax (608) 724-1558
pharmacist@qualiteerx.com

Qual-i-tee Pharmacy is a new type of pharmacy in Madison.

One where the pharmacist knows your patients' names and cares for them, just like you do, after they leave your clinic.

We support your patients between clinic visits. We work with you and your staff help provide the best care to your patients by proactively reviewing their medication lists and following up with them between refills.

We specialize in helping patients with low health literacy, complex medication regimens, or difficulty managing their medications at home.

We are a direct-pay pharmacy. This means your patients pay the pharmacy directly for prescriptions and services with no insurance middleman. The vast majority of prescriptions filled today are generic drugs , so when your patients pay us directly, they get the real price — and it's often lower than their copay. **Most prescriptions we dispense are between $10 and $16.** And if there is a cheaper alternative, we will work with you to help save your patients money. Plus, prescriptions filled at Qual-i-tee Pharmacy are HSA and FSA eligible.

We offer FREE pouch packaging for all of our patients. This service helps your patients keep track of their medications leading to fewer missed doses and fewer medication mix-ups at home. Free delivery is included with our pouch packgaing service.

Have a question about one of your patients or a medication? We don't have a phone tree, so you can call and talk to a pharmacist right away.

We are part of the community we serve. We are a fully independent, pharmacist-owned local pharmacy. We live where we work and we are proud to help our neighbors access the care they need.

Qual-i-tee Pharmacy is a full-service pharmacy located on the corner of University Avenue and Shorewood Boulevard. We provide your patients with access to transparent and affordable prices on prescription and over-the counter medications.
